

roll covers for the paper making industry

→ Coating machines

Coating rolls | Coater backing rolls | Applicator rolls

Compound	Machine position	Hardness	Cover thickness	Features
P Series Rubber	Coater backing rolls Applicator rolls	50 - 85 P&J	15 - 25 mm	<ul style="list-style-type: none"> • extremely homogenous surface • suited for all coating media • optimum elasticity coupled with excellent wear resistance • high friction coefficient • adaptable to permanently rough surface structures
H Series Rubber	Coating rolls Coater backing rolls Applicator rolls	50 - 85 P&J	20 - 25 mm	<ul style="list-style-type: none"> • increased resistance to temperature and fatigue • good release properties • suited for all coating media • optimum elasticity coupled with excellent wear resistance • high friction coefficient • adaptable to permanently rough surface structures
X Series Rubber	Coating rolls Coater backing rolls Applicator rolls	50 - 85 P&J	20 - 25 mm	<ul style="list-style-type: none"> • special polymer for excellent abrasion resistance • adaptable to permanently rough surface structures

These overviews are supposed to give a general idea of what we provide. Different hardness rates are available on application. Surface design/finish, elasticity and functional properties can be designed to any special requirements.
