

roll covers for the film and foil industry

→ **Manufacture of laminated film**
Film extrusion and lamination

Machine position	Compound	Hardness	Features
Pressure rolls	7By3 Rubber	70 ShA	<ul style="list-style-type: none"> • surface with ideal anti-adhesive properties • best suitable for non-polar film • cover color: grey
Immersion rolls, impression rolls	7By70 Rubber	75 ShA	<ul style="list-style-type: none"> • immersion roll cover for paint and glue application • electric conductivity • excellent chemical resistance • high abrasion resistance • cover color: black
Hotmelt applicator rolls	8H3 Rubber	80 ShA	<ul style="list-style-type: none"> • excellent resistance to temperature • high resistance to ozone and UV radiation • cover color: grey

These overviews are supposed to give a general idea of what we provide. Different hardness rates are available on application. Surface design/finish, elasticity and functional properties can be designed to any special requirements.
