

roll covers for the paper converting industry

→ Corrugated cardboard manufacturing

Machine position	Compound	Hardness	Features
Splicer rolls	5By3 Rubber	50 ShA	<ul style="list-style-type: none"> • excellent abrasion resistance • resistant to ester, ketone and ozone • cover color: grey
Size applicator rolls	7K2 Rubber	70 ShA	<ul style="list-style-type: none"> • material offering optimum elasticity and excellent abrasion resistance at the same time • cover color: black
Run out rolls Feed rolls	7P41 Rubber	70 ShA	<ul style="list-style-type: none"> • excellent abrasion resistance • excellent resistance to oil, grease and fuels • cover color: red
	U70 Polyurethane	70 ShA	<ul style="list-style-type: none"> • excellent wear resistance • excellent resistance to oil, grease and fuels • extremely resistant to ozone • optional electric conductivity • cover color: red
Paint immersion rolls	6By2 Rubber	60 ShA	<ul style="list-style-type: none"> • excellent abrasion resistance • resistant to ester, ketone and ozone • cover color: black

These overviews are supposed to give a general idea of what we provide. Different hardness rates are available on application. Surface design/finish, elasticity and functional properties can be designed to any special requirements.
