

roll covers for the sheet metal industry

→ Sheet metal finish

Machine position	Compound	Hardness	Features
Coating and paint applicator rolls	6By4 Rubber	50 - 70 ShA	<ul style="list-style-type: none"> • standard cover offering good elasticity and wear resistance at the same time • very good resistance to commonly used lacquers • cover color: grey
	5By73 Rubber	50 - 75 ShA	<ul style="list-style-type: none"> • material offering optimum elasticity and excellent wear resistance at the same time • very homogeneous cover surface • very good resistance to commonly used lacquers • cover color: green
	5By50 Rubber	55 ShA	<ul style="list-style-type: none"> • special compound with excellent resistance even to very aggressive lacquer solvents • cover color: brown
	Q.teraL Polyurethane	40 - 60 ShA	<ul style="list-style-type: none"> • excellent resistance to solvents for paints, coatings and lacquers • very homogeneous cover surface offering optimum wettability • good transfer properties • suited for all coating media • good abrasion resistance and tear strength • cover color: green

These overviews are supposed to give a general idea of what we provide. Different hardness rates are available on application. Surface design/finish, elasticity and functional properties can be designed to any special requirements.
