

roll covers for the textile industry

→ Weaving

Machine position	Compound	Hardness	Features
Squeezing rolls	9H30 Rubber	90 ShA	<ul style="list-style-type: none"> • material offering optimum elasticity and wear resistance • suited for acid and alkaline pH range • excellent resistance to all common textile additives • cover color: black
Feed nip rolls	7P41 Rubber	70 ShA	<ul style="list-style-type: none"> • excellent abrasion and cutting resistance • good resistance to oil and chemicals • cover color: red
Carrier rolls	6P12 Rubber	65 ShA	<ul style="list-style-type: none"> • excellent abrasion and cutting resistance • good resistance to oil and chemicals • cover color: red

These overviews are supposed to give a general idea of what we provide. Different hardness rates are available on application. Surface design/finish, elasticity and functional properties can be designed to any special requirements.
